A passionate full-stack developer skilled in C#, .NET, React, and API integration with a proven ability to design scalable, real-world solutions. Adept at delivering high-quality projects within deadlines and continuously learning to keep up with advancements in the tech world.

Skills

- **Backend:** C#, .NET Core, ASP.NET MVC, Java, Entity Framework, Node.js
- **Frontend:** React, TypeScript, JavaScript, HTML5, CSS, SASS, Razor Views
- **Databases:** SQL Server, MongoDB, PostgreSQL
- **DevOps:** AWS, Azure, Firebase, Docker, Git
- **Tools:** Visual Studio, CI/CD, RESTful APIs

Key Projects

Bulky Web

- Developed a full-stack ASP.NET Core MVC application for inventory management in the book industry.
- Features include CRUD operations, category and product management, role-based authentication, and a responsive UI built with Razor Views and Bootstrap.
- Hosted on Azure App Services with SQL Server as the backend database.

Blog Poster

- Created a blog management system with rich text editing (TinyMCE API), Azure Blob Storage for image management, and user authentication using Microsoft.AspNetCore.Identity.
- Integrated features like scheduling blogs, draft management, and role-based access control.
- Deployed on Azure App Services with MySQL for backend data storage.

Professional Experience

Web Developer | Bit Space Development Ltd.

April 2022 - July 2022

- Implemented React for the frontend and developed models and controllers in C#.

- Built scalable server-side solutions and documented software upgrades for medical products.
- Utilized .NET Core, TypeScript, React, SQL Server, and AWS for development.

Freelancer | Hatchways

March 2022 - April 2022

- Implemented React for the frontend and developed models and controllers in C#.
- Implemented CI/CD pipelines and collaborated with developers on code reviews and design.

Web Developer (Intern) | Manitoba Construction Sector Council

June 2021 - September 2021

- Resolved bugs in live systems and migrated MySQL databases to new Ubuntu servers.
- Proposed innovative business solutions and worked in cross-functional teams.

Full Stack Developer | ACE Project Space

January 2021 - March 2021

- Designed and deployed microservices for scalable web applications using Node.js, TypeScript, and React.
- Developed an intuitive website for the BRINGITNOW firm with a customer-focused approach.

Education

- **Business Information Technology** | Red River College
August 2019 – December 2021
- **Mathematics (High School)** | DCM
April 2016 – April 2018

Hobbies and Interest

- Cricket, chess, reading, programming new languages, and exploring new technologies.
- Engaged in solving algorithmic challenges and attending tech events to network and learn.
